DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. The after final amendment filed 2/28/2003 (paper no. 15) is acknowledged and entered into the record. Accordingly, claims 5-7, and 20 are amended.
3. Claims 1,3,5-7, and 10-30 are pending and examined on the merits.

New Arguments

Claim Objections

4. Applicant is advised that should claims 1 and 3 be found allowable, claims 18 and 19 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 1642

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 12-13 and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kellen J *et al* (EMBL/GenBank/DDBJ Database submitted June 1998) or Waterston R *et al* (EMBL/GenBank/DDBJ Database submitted June 1998) in view of Harlow *et al* (Antibodies, A Laboratory Manual, Chapter 5, page 76, 1988).

Claims are drawn to an isolated antibody that binds specifically to SEQ ID Nos. 1 and 2.

Kellen J *et al* and Waterston R *et al* disclosed the sequence of which was publicly available as of June 1998. Harlow *et al* teaches that antibodies can be made to proteins with as little as 6 amino acids.

Therefore, it would have been *prima facie* obvious at the time the invention was made to one of ordinary skill in the art to make antibodies against the polypeptides of Kellen J *et al* and Waterston R *et al*. for the purposes of isolating and detecting the expressed antigen. Further, one would expect that polyclonal antibodies would cross-react with the polypeptides of SEQ ID NO: 1 and 2 because the antigen of Kellen J *et al* and Waterston R *et al*. indicates a 65% identity match to the polypeptide of SEQ ID NOs:1 and 2. The antibodies produced would cross react and bind to an epitope of the Kellen R *et al* or Waterston *et al* protein because the smallest synthetic peptides that

Art Unit: 1642

will consistently elicit antibodies that bind to the original protein are 6 residues in length (Harlow *et al.* , Antibodies, A Laboratory Manual, Chapter 5, page 76, 1988).

Conclusion

8. Claims 12-13 and 25-26 are rejected. Claims 1,3,5-7, 10-11, 14-24, and 27-30 are free of the prior art.
